ABOUT THE PROJECT

This project **–"MENTOR ALLOCATION SYSTEM"** allots mentors to the students based on their choice filling and their CGPA. The whole process is supervised by the HOD(THE HEAD OF DEPARTMENT). Firstly, the professors need to register themselves, then they are verified by The HOD. After being verified ,the professors need to upload their area of interest. When every professor is done with it, the HOD updates the number of students to be alloted under a particular professor. Now the students are asked to register on the website. After verification, the students need to fill their SGPA and choice filling with which professor they want to work with in order of preference. After each student is done with it,the HOD approves the CGPA filled by the students and generate the list containing students along with their allotted mentors. Both the student and professor gets the confirmation with whom they have to work. Thus, the whole process completes!!!
